

SPRINKLER HANGER

Application :

A SPRINKLER HANGER recommended to provide vertical support to non insulated piping systems. By adjusting the position of the sprinkler nut on the hanger rod at the top of the hanger, pipe elevation can be altered.

Construction:

A SPRINKLER HANGER consists of a piece of carbon steel shaped to support pipe. Gives Double thickness at the support. Most suitable for fire extinguishing pipes installation.

Material:

Carbon Steel. Also other materials can also be provided on request

Finish Available:

Plain, Hot Dip Galvanized, Electro-Galvanized.
